

# CHEMICAL SCIENCES AND PHYSICAL SCIENCES PATENT ATTORNEYS

Cambridge, Oxford or remote

Join our growing business, working with our clients building technology that will define tomorrow. We help them navigate that journey, using IP to imagine, plan, nurture, protect and deliver their innovations to market. Intellectual property rights are business-critical; clients need to be confident that they are supported by genuine expertise and relevant IP advice. Our clients cover a diverse range of technologies and are all striving to make a difference in their chosen field.

## Why join us?

Our attorneys have an unrivalled depth of technical understanding and sector knowledge. This means that we regularly advise on uncharted areas and work on cases and deals that help define the sector. We are passionate about our clients' industries, what they do, how they do it and how we can help to make it even better. We work closely with our colleagues in the Life Sciences team where clients bridge the gap technologically.

Our strategic approach is always personal and client focussed. Collaborating with other professional advisors to ensure all of our clients benefit from "joined up" thinking when it comes to their IP strategy.

## The Roles includes:

- Working with exciting clients ranging in size from inventors, start-ups, SME's to large institutions, universities, you will build strong and lasting relationships
- In addition to drafting and prosecution for these clients, you will be involved in freedom to operate analysis, due diligence exercises, portfolio management, and opinion work, to ensure that the portfolio is managed strategically
- Providing assistance and guidance to our aspiring patent attorney trainees who are ready and willing to learn

## About you:

- Either a degree in a chemical sciences discipline with a focus on life sciences, preferably with experience with nucleic acid or protein patents
- Or a degree in physical sciences, preferably with some experience in software or electronics
- Postgraduate qualification preferred
- EPA and/or CPA qualified, with at least 1 year's post qualification patent experience
- Experience of drafting and prosecution of EP and UK patents
- Direct client contact experience preferable
- Strong interpersonal, negotiating, analytical and problem-solving skills
- Able to make strategic decisions, to assume responsibility and take accountability
- Well-founded scientific knowledge and expertise, allowing for the critical evaluation of disclosures for IP opportunities, desire to learn more
- Able to analyse rigorously scientific, legal, and commercial information and reach logical, well-reasoned conclusions
- Able to take a broad approach, to solve a detailed problem with an understanding of how this impacts a larger strategy
- Ambition to play a leading role in an exciting, growing company
- Strong time management and organisational skills

Competitive salary and benefits on offer, pension, life assurance, private health and discretionary bonus.

Full or part-time considered, flexible working hours possible.
